1 Description

The GLP X4 atom has been designed from the ground up to be as versatile a light as possible in a number of different ways.

With its small body, designed to fit subtly into the tightest spaces yet give big coverage, the X4 atom is a new everyday fixture for static sources. From television and film, to corporate events, set lighting and special events. From concert touring stages and truss systems to architectural elements, the X4 atom has a use everywhere.

The X4 atom is fitted with the same high output quad color LED source that we use across the X4 range, giving it a bright, full spectrum output from its compact size. But the X4 atoms small size houses a lot more, starting with a 9 to 1 zoom ratio that goes from a wide 34° wash down to a tight 3.5° beam for pinpoint accuracy and great mid-air effects. Something which no other fixture offers and all the while maintaining a clean output and even distribution of color and intensity.

But it doesn't stop there. As versatility is the key, we made the housing IP 65 rated allowing it to be used on events and shows all year round, indoors or out. And for times when one X4 atom just isn't enough, we've created a clever and fast interlock system that allows fixtures to easily be coupled together.

The standard hanging yoke is easily removed and you can quickly assemble pairs, quads, lines and grids of fixtures in any configuration that you need ? and still keep individual control of each atom head creating stunning displays.

The X4 atom runs from an external power supply that feeds each fixture via an industry standard 4 pin XLR color changer cable, tapping into existing infrastructure and not trying to reinvent things again and reducing the overall environmental impact of the atom.

2 Light Distribution

Table 1: Summary of beam opening angles for different fixture configurations.

| Beam | Beam Angle (50%) | | Field Angle (10%) | | Cutoff Angle (3%) | |
|---------------|------------------|-----|-------------------|-----|-------------------|-----|
| | C0 | C90 | C0 | C90 | C0 | C90 |
| Narrow, Red | 4 | | 4 | 5 | 5 | 5 |
| Narrow, Green | 4 | | 4 | 5 | 5 | 6 |
| Narrow, Blue | 4 | | 4 | 6 | 6 | 6 |
| Narrow, White | 4 | | 4 | 5 | 5 | 5 |
| Narrow, Full | 4 | | 4 | 5 | 5 | 6 |
| Medium, Red | 10 | | 10 | 18 | 17 | 20 |
| Medium, Green | 10 | | 10 | 17 | 17 | 19 |
| Medium, Blue | 10 | | 10 | 17 | 17 | 19 |
| Medium, White | 11 | | 10 | 18 | 17 | 20 |
| Medium, Full | 10 | | 10 | 18 | 17 | 20 |
| Wide, Red | 21 | | 21 | 32 | 32 | 34 |
| Wide, Green | 20 | | 20 | 32 | 31 | 34 |
| Wide, Blue | 20 | | 20 | 32 | 32 | 34 |
| Wide, White | 21 | | 21 | 32 | 32 | 34 |
| Wide, Full | 21 | | 21 | 32 | 32 | 34 |

Table 2: Summary of luminous flux and intensity for different fixture configurations.

| Beam | Total Lumen Output (lm) | Peak Luminous Intensity (cd) |
|---------------|-------------------------|------------------------------|
| Narrow, Red | 49 | 9618 |
| Narrow, Green | 93 | 18875 |
| Narrow, Blue | 18 | 3653 |
| Narrow, White | 122 | 24957 |
| Narrow, Full | 254 | 49632 |
| Medium, Red | 57 | 1789 |
| Medium, Green | 109 | 3841 |
| Medium, Blue | 22 | 775 |
| Medium, White | 150 | 4759 |
| Medium, Full | 311 | 9975 |
| Wide, Red | 58 | 509 |
| Wide, Green | 110 | 1041 |
| Wide, Blue | 23 | 208 |
| Wide, White | 152 | 1315 |
| Wide, Full | 316 | 2811 |

Table 3: Summary of luminous flux and intensity for different fixture configurations.

| Beam | Parameter | Factor | Projection Distance [m] | | | | | | | | |
|---------------|------------------|--------|-------------------------|-------|-------|-------|-------|-------|-------|------|------|
| | | | 5 | 7.5 | 10 | 12.5 | 15 | 17.5 | 20 | 22.5 | 25 |
